Handmade tapestries  
Sustainable | Grounding | Luxurious

## Hanging of the tapestries

- ~ Stretched on the stretcher frame
- ~ Stitched and adheared to a stretched frame
- ~ Free hung on a timber, metal or brass dowel
- ~ Flat hung on a timber slat with hook and loop system

### Treatment

Through out the felting process all natural materials are washed in soapy hot and cold water baths minimum of 5 to 7 times. At the end they are rinsed in the vinegar and steamed.

For Domestic clients I leave it up to the client if they would like to treat the artwork professionally, as everyones sensitivities to chemicals are individual.

For commercial clients I suggest to treat the artwork professionally, as it will be hanging in a public space.

### Maintenance

Dusting with lambs wool duster. For deep clean steaming can be applied.
